Inner Windows  
(Hans York)

Inner windows open wide  
Send my love into the night  
Hope it travels save to you  
Turns my sky from grey to blue

Inner windows, I reach out  
Touch your heart and talk about  
You don't see and walk pass by  
Leave me with a silent cry

Windows, Inner windows

Motion blur, stonewalls run by  
Underground in suit and tie  
Wonder what is on your mind  
You look tired you seem blind

Look around a waiting room  
Hope my name is called up soon  
Catch a glimpse your eyes they spark  
Shine a light into the dark

Windows, Inner windows  
Windows, Inner windows

Open field the grass is blue  
Lay right down and think of you  
All this time will stay with me  
Inner windows now I see

Windows, Inner windows  
Windows, Inner windows
