Love is here (Hans York)

It's when you listen then you can hear
It's when you listen then it's there
It's like a bird song that you're missing
Now you can't find it anywhere

Think it's down when everything is pointing up
Take a left then right away into the dark
Touch the walls and put your head against them so
they break

Love is here when you are there
Love is here, it's everywhere

It's when you open up your senses
It's when you open up your heart
It's when you hide behind defenses
Turn on your key but it won't start

Think it's down when everything is pointing up
Take a left then right away into the dark
Touch the walls and put your head against them so
they break

Love is here when you are there
Love is here, it's everywhere
