Drink, smoke, fuck, fight, pop a couple pills. Nothing to do tonight but kill all of your brain cells you. You don't seem to mind that there's nothing more to your life. Doesn't surprise me. you're as sharp as a butter knife. you are a waste of space. no work, no school, you never get nothing done. Being drunk or stoned is the only way that you have fun. Is the day gonna come when you wake up from your daze and realize that you are a waste of space. You'll never understand, 'cause your friends all act the same. Well I am moving on 'cause I don't want to play this game.
