Where's the sense in trying to do what you think is  
best?  
when people spit in your face it really puts you to the  
test  
nothing you do is good enough  
no one even gives a fuck  
if they want what you've got  
they'll tread all over you  
and there's not a damn thing you can do

don't try be like them

you dont want to be part of their crew  
to fit the mould they do what theyre told  
and never question right or wrong  
bunch of arrogant shits with nothing better to do  
than look down on you
