Mark Baker, Mike Slamer)

Yeah yeah, alright

In the middle of a deep dark night, your body soaked
in sweat

Outside it's cold as ice, but you're burning up your bed

You've got a nasty little fever and it's climbing up high

Nothing you can do to stop the aching inside

I can relieve you, you know that I could

You've got it bad, baby I'll make it good

Hang on to dr. Love, I know what you need, baby just
call me

Hang on to dr. Love, my love will set you free

Just for the night, gonna make it alright

Your head is spinnin' 'round, your heart beats out of
time

Don't wear your body down, with what's been on your
mind

You've got a dirty little secret and it's killing you slow

Nothing you can do to cool the fire down below

I can relieve you with a touch of my hands

I'll beat the fever, baby I am your man

Hang on to dr. Love (call the doctor)

I know what you need, baby just call me

Hang on to dr. Love (call the doctor), my love (will set
you free)

Time is to heal the soothing same old shame you
grieve in

You can't wait, you need me right away

The night is dark, it's dark of shame, but I will heal you

Treat your pain, until you call my name

(Solo)

Hang on to dr. Love (call the doctor)

I know what you need, baby just call me

Hang on to dr. Love (call the doctor), my love will set
you free

(repeats 2x)
