Let them talk if they want to  
Baby, talk don't bother me  
I want the whole wide world to know  
That I really love you so

And let them whisper for they know not  
What's between you and I, oh  
You know I'm gonna keep on loving you  
'Til the day, 'til the day that I die

They're tryin' to breakup our romance, woah  
Darling they don't stand a chance  
Baby, we got a kind of love that's so strong  
We'll be together, together from now on

I don't gossip you know is the devil's workshop  
And I know true love can make it stop, yeah  
I want the whole wide world to know  
That I really love you so

Oh, they're envious of everything that we do  
And I wanna tell you baby, it's wonderful, yeah  
When you love someone and that someone really loves  
you  
I'm gonna tell you darling, I love you and I know you  
love me, oh  
Well, now, well, now now, love you, oh
