14 year old boy said "I can take it any longer"
To fight for freedom and humanrights we must be
much stronger
I'm just fourteen but I've got a life to live
Lets come together, there is so much for us to give

Lets share that feelin, together we'll stucked on this
planet
And show some respect, and love is what you'll get
Together we must fight for human rights
Look your fears right in the eyes, and

Do you actually know who lives next door
Come lend them a hand, you know were that is for
People staced away in their homes
Let them come out, let's join together,

Put your hands above your head
Lift them above your mind, don't think just feel it!
Rearch for the hands next to mine
Feel them, grab them fast, hold them tied
Open all your doors, make a chain of light
