[This is the Night
When all is dark and there's no light
Lost in the deepest star of night
I see you

Your hands are sinking baby
You ain't been sleeping lately
There's something out there
And it don't seem very friendly does it?
If I could help you I would help you
But it's difficult
Theres something much more powerful
And those far-fetched possessing me
I got to got to break cause ah I don't wanna feel like
this ah
Your voice keeps haunting me
I cannot eat or sleep
I'm going crazy in this hazy fantasy
You put a spell on me
But I ain't going down that low

So take your hands off me tonight I'm breaking free
this is the night
This is the night,
So take your hands off me tonight I'm breaking free
this is the night
This is the night

There was a time I would've walked
On burning coals for you
Sail across the ocean blue
Climb the highest mountain just to call your name
The moon throws down its light
Cuts me to the quick tonight
Dangers in the air
Nothing will ever be the same

You still look good to me
Ooh but you're no good for me
I close my eyes and
Squeeze you from my consciousness

And in the morning when I wake
I walk the line
I walk it straight
But the morning's so many miles away
Good God now!

So take your hands off me tonight I'm breaking free
this is the night
This is the night,
So take your hands off me tonight I'm breaking free
this is the night

This is the night; (echo and repeat until fade out)
