Someone told me that saw you last child  
And somehow I knew that he couldn't be real  
But I'm here to save you from meÂ...  
Slowly my girl I've been building my empire  
And every dark smile is a new brick I get  
Its getting stronger for me

Trembling in darkness my people is waiting  
In this kingdom you're queen cause I am the king  
Slave of myselfÂ...its getting stronger for meÂ...

All my life I've been working to give you life  
You are all made of fire you're all made of chains

Sweating in madness my people stills waiting

For me to take the crown to beg for their lives  
Drifted by power, I've steal the key  
To close all the doors to keep them away from me  
To keep them away from me!!!

I saw what they want and they want may soul and head  
The walls of my fortress have started to fall  
So come on my girl there's a secret door downstairs  
There's only one way to let us free I know  
Is an old gun yeah  
With a golden trigger for meÂ...  
To keep them away from me!!!
