Can somebody save me
Can somebody tell me I'm wrong
You should have known
That I'm unable to do it on my own

I took a bunch of pills, my body's got convulsions
And I'm alone
My vision's troubled now,
I'm afraid of the dark that's all I know
I'm in the tropic of cancer, I am the center
Of my own universe
I'm in serious trouble now, I've got no solutions

Can somebody save me
Can somebody tell me I'm wrong
You should have known
That I'm unable to do it on my own

Can somebody save me
Can somebody tell me I'm wrong
Where have you been
To save myself from what I used to call the end
