Im alone in the country  
Took a walk in the country  
All alone in the country

Blade of grass in the country  
Sour mash in the country  
All the cash in the country

There are no lions in England  
There are no lions in England  
There are no lions in England no, no, no

Ill call you home  
Then you start delivering  
Taking my time then you start your quibbling  
Now I know your meddling, youre still back pedalling  
I should have quit you a long long time ago

There are no lions in England  
There are no lions in England  
There are no lions in England no, no, no

There are no lions in England  
There are no lions in England  
There are no lions in England no, no, no

There are no lions in England  
There are no lions in England  
There are no lions in England no, no, no
