Space exploration for nuclear stations  
NASA corrupters, jewelled abductors  
Space exploration, excursion to the stars  
On a military mission on a military mission to Mars  
I'll see you in my star  
I'll see you in my star

Solar system bases, the new world order  
Lust for space dust, forming galaxy borders  
Never seeking new life, only planning war  
Sending satellites at new height, satellites to destroy  
I'll see you in my star  
I'll see you in my star

Space exploration for nuclear stations  
Nasa corrupters, jewelled abductors  
Space exploration, excursion to the stars  
On a military mission on a military mission to Mars  
To boldly go where no man's ever been before  
Astronauts the new conquistadores  
See you in my star  
I'll see you in my star (x3)
