In the blood of every lost soul  
Runs the venom that turned eternal bliss into a living  
hell  
It's spreading like a virus  
One you cannot kill

This venomous game is my creation  
I made you who you are  
There is no cure for this evil  
Causing the panic to spread

Yeah  
Let there be chaos and let it reign  
It will make the brave new world  
Bite until it bleeds  
Malice is the new disease

The flesh you've tasted, the seed you've sown  
The venom eats you from the inside  
You're on your knees begging to be saved  
Begging me to put an end to the agony

Yeah  
Let there be chaos and let it reign  
It will make the brave new world  
Bite until it bleeds

Malice  
The venomous kill  
Venom  
The malevolence of this world  
YEAH!
