Nameless faceless number on a  
Collision course with no place  
Show me a reason for survival  
And I'll laugh until I salivate  
Gimme useless nothing smiles  
I'll cut the shit-eater off of your face  
Crack your skull like an egg, squash your brain like a  
grape  
There is no time like the present to erase our nothing  
Past the world's a never ending desert  
With a cactus up its ass if I could reach the fuckin'  
Button I would blow it all away  
Termination, salvation, gimme some oblivion  
Make me deceased, give me release, desolation  
Dust in the wind  
You can't ever come back, but there's nothing worth  
Comin' back for  
Can't feed the population, but the mothers just keep

Makin' more  
Brain washing propaganda, 'til I don't know  
What's wrong or right  
Give your life for your country  
It's like you just died for nothing  
There's so much prejudice and  
Hatred, ignorance  
Won't let it go away  
Born and bred to kill each other  
Black and white our future's gray  
I would love to push the button  
Why waste perfectly good graves  
Nameless faceless number on a  
Collision course with no place  
Show me a reason for survival  
I'll laugh until I salivate  
Nameless faceless number on a  
Collision course with no place  
There's no reason for survival!
