eyes on you
every time
every move
she walks in
takes it away now
away now this sin

i know you know
i should know better
she knows i would never do it never
i know you know
i should know better
she knows i would never do it never

won't you come and tell me
tell me
tell me now
won't you come and tell me
tell me
won't you come and tell me
tell me
tell me now
won't you come and tell me
tell me

eyes on you
every time
every move
she walks in
takes it away now
away now this sin

i know you know
i should know better
she knows i would never do it never
i know you know
i should know better
she knows i would never do it never

won't you come and tell me
tell me

tell me now
won't you come and tell me
tell me
won't you come and tell me
tell me
tell me now
won't you come and tell me
tell me

won't you come and
won't you come and
won't you come and tell me
tell me
won't you come and
won't you come and
won't you come and tell me
tell me

i know you know
i should know better
she knows i would never do it never
i know you know
i should know better
she knows i would never do it never

won't you come and
won't you come and
won't you come and tell me
tell me
won't you come and
won't you come and
won't you come and tell me
tell me
