"Day after day after day you live in your  
misconceptions  
Cause our actions don't speak as loud as our words it  
hurts, my friend  
Can I help you understand?  
Can I please help you understand?"

It's not bred out of fear, it's sprung out of love  
It's what we've been in search of  
Now spring clear of all the lies  
And sever all the ties with tangled webs of futile  
thinking  
Now spring clear of all half-truths  
Cuz the burden of proof doesn't rest on an institution

Yeah I can see all the hurt and the misery resulting  
From the fact that Christians are the biggest sinners of  
them all  
But please don't fall  
Don't let all who come in Christ's name fool you  
Don't you dare, oh don't you dare

It's not bred out of pride, a trophy on the shelf  
I can't save you, I can't even save myself

If while we've been on our knees our eyes have been  
closed  
To all the pain and suffering I cry out "God forgive us!"
