You can't be crying now i feel so happy that we're here together.

You're eyes must be filled with the mist of underwater cigarettes.

We've lathered our selves here now lets go swim in the citys reservoir.

Don't even think like that right now we'll just be further and further away.

Cause we cradled in no beggining and no end  
Like naked bathtub goldfish shimmering in timeless candle light.

Adjust my night time eyes to see you swim like ancient swimmers do.

Don't even think like that right now we'll just be further and further away.

Cause we're cradled in no begining and no end

So don't dive shallow in deep dark waters

No don't dive shallow in deep dark waters

No don't dive shallow in deep dark waters

No don't dive shallow in deep dark waters

No don't dive shallow in deep dark waters

Don't dive shallow in deep dark waters with me.....

Oh, oooo

(... fades out...)
