Brock -)
Well my body's burning up
And I'm feeling so bad
And I think it must be something that I've just had
Screaming sounds are buzzing through my brain
Am I mad or am I sane?
I can't control my body anymore
It's reaching down into the very core
I've gotta find a way of solving the solution
Is this what they call brainbox pollution?
Take my hand, I'll lead you on
To learn so far, my dreams your own
Is this world that we all find
It's leaving us so far behind
