"Lighthouse"

Visit "[Lighthouse](#)" on MotoLyrics.com

Far Away in outer space
A Lighthouse guiding star
It's there to help the human race
and tell them where they are
So take a fix on Lighthouse
And home into its beam
And light the lasers in your heart
For all the world to see
A voice comes in on radio waves
Transmitted out in space
It's helping us and tuning in
To realign our race
So take a fix on Lighthouse
And home into its beam
And light the lasers in your heart
For all the world to see
Cosmic sound and laser light
Tools Lighthouse uses well
It signals out across galaxies
Where crystal people dwell
So take a fix on Lighthouse
And home into its beam
And light the lasers in your heart
For all the world to see
