"They've Got Your Number"

Visit "[They've Got Your Number](#)" on MotoLyrics.com

They got your number, they got your name
You are the one they will blame
Accused of being the leader of the pack
You are the one who wouldn't turn his back

They try everything, but it's all turned out the same
"They lied" you said, but you know that you will still be
framed

They got your number, they got your name
They got your number, they got your name

Do you not now see what their problem is
They can't accept your solution
Though we all see that you pay the price
The rest of your days will be spent in seclusion

They try everything, but it's all turned out the same
"They lied" you said, but you know that you will still be
framed

They got your number, they got your name
They got your number, they got your name
