Our Timeship - Atom centuries  
Alpha waves compute before eternity began  
Lone protons, probing vast galaxies  
We seek the void where creation once cried on

Time Captains  
We synthesize the rays power in your brain  
We are Time Capitains  
We synthesize the rays power in your brain  
We are Time Capitains, We are Time Capitains  
Network cosmic might learn your destiny  
We are Time Capitains, We are Time Capitains  
We write the Astral Records of history

Oceans free-fall  
Waves interweave patterns Dizzy space  
Sound ball; Soft Birth  
Colours congeal electricity  
Cosmoscope sparks  
Night laughs cool flare; heartbeat  
Serian Sun
