Brock -)

Time we left this world today

Time we left this world today

Time we left this world today

So many people seem to say

"Time we left this world today"

They watch you as you seem to say

"Time we left this world today"

They watch you as you walk the street

Cast sly glances at who you meet

Brain police are not far behind

Trying to make you lose your minds

Time we left this world today

Watch you as you walk the streets

Make you sit in your house and say

"Time we left this world today"

So many people seem to say

"Time we left this world today"
