Between the future and the past tense  
Lies the present in the distance  
So you think we're never coming back  
Scoring points for passion and persistence

Between the lines and the highway  
Lies the danger and the safety  
You never thought this was gonna last  
I always knew you'd never take it back

I always knew  
(I always knew)

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket

Between the sadness and the smile  
Lies the flicker of the fire  
You always said this never hurt you  
I always said you were a liar

With all the towers and the wires  
There still lies a little silence  
Two hearts and one connection  
One voice lets emotion out

I always knew

(I always knew)

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket

Instead of flowers like words that never mattered  
Close it off, forget about the sadness  
(Close it off, forget about the sadness)

He always said she should have tried crying  
Blaming him as she was lying down  
(As she was lying down)

Not coming back  
(I'm not coming back)  
Not coming back  
(I'm not coming back)

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket

I know it seems like we're never coming back  
I know it feels like we're never coming back  
You tried your best and you knew it wouldn't last  
These were the words that she placed on her casket
