

## Hayden "Long Way Down"

Visit "[Long Way Down](#)" on MotoLyrics.com

Do you ever go to the places we both were known?  
Do you walk where we used to roam?  
Do your thoughts go by me in their flow?  
When Im alone sometimes I need to know  
Baby, it's a long way down  
And I wonder how youve changed  
Have the years left lines I can't trace?  
Has your brain lost cells that wont replace?  
And are you light or weighed down with mistakes?  
When it gets late sometimes I see your face  
Baby, it's a long way down  
Baby, let your feelings show  
Its all I need from you to let go  
Cause baby, I can't stay this low  
When there's so much I need to grow  
And I know you never go to the places we both were  
known  
And you don't walk where we used to roam  
And your thoughts don't pass me in their flow  
Because if they didn't I wouldn't be out alone  
Baby, it's a long way down  
Baby, let you feelings show  
Its all I need from you to let go  
Cause baby I can't stay this low  
When there's so much I need to know
