Come On

I see you smiling you're smiling for the camera
You're trying to catch a moment of truth in
Propaganda Well all the doors are open and
You know what's important you're here to live
Your life or are you here to front for shorty
Come on I know that you're waiting come on
So check the price you're paying come on
You can't afford the minutes You know the
Time is moving You know the clock is ticking
Right now it's the only moment that counts Is
Right now Is the only time I've no doubt Is right
Now

I know the struggle that happiness is haunted
You don't get what you need And you don't
Get what you want Now everything is ringing
Reality is calling If you're digging Gary Busey
You're living Buddy Holly

Come on Lean into the curve and come on
You know the nerves are perfect come on
Look down from above it just see just where
We're at And to know how far we've come
