I miss feeling you there by my side
I miss holding you close in the night
I miss things that we used to do
I miss you

And I'm sure there are moments when you stop to think
about me
And I'm sure there are moments when you stop to think
about me

I've been thinking the things that I said
And I see the reason that you may have left
I hear songs that remind me of you
I miss you

And I'm sure there are moments when you stop to think
about me
And I'm sure there are moments when you stop to think
about me

So you know I still miss you
So I'm sure you miss me too

And I'm sure there are moments when you stop to think
about me
And I'm sure there are moments when you stop to think
about me
And I'm sure there are moments when you stop to think
about me
And I'm sure there are moments when you stop to think
about me
