Ave Maria

Ave Maria Mother mild Oh listen to a woman's prayer  
For you can hear me through the wild And you can save  
me from despair Keep me from despair And safe I  
sleep beneath your core Though banished outcast, and  
reviled Oh mother hear a woman's prayer Oh mother  
hear your loving child Ave Maria Ave Maria Undefined  
The coldest night we share together Will seem with  
down of eider piled If your protection covers there If  
you are there The darkness and the heavy air Shall  
breathe of perfume if you have smiled Oh mother hear  
a woman's prayer Oh mother hear your loving child Ave  
Maria
