Christmas Waits

How long have I been watching from my window
Running through my life Watching it all go by Seems
like I've always got a destination Running down the
time Pushing to the front of the line I wanna be where
the snow is falling Voices of friends like angels calling
(Out in the pines - oh beautiful tree) I wanna be there
where Christmas waits for me Christmas waits Gather
round the fire let the weather rage outside Christmas
waits I always will be welcome for the rest of my life
Christmas waits
