Unto us a child is born, Let us welcome not the gift to
all humanity

Unto us a child is born, hes the strength of spirit
cloaked in mortal frailty

Praise him, honor him, welcome him into the light.
Praise him, honor him, bring him out of endless night.
Unto us a child is born.

Unto us a child is born, see we now the babe of beauty
and of innocence
unto us a child is born, let us fill the night with smoke of
myrrh and frankincense

Praise him, honor him, welcome him into the light.
Praise him, honor him, bring him out of endless night.
Unto us a child is born.

Unto us a child is born, Hes the lording of all life and all
earthy green
Unto us a child is born, may he shine a light far
brighter than we've ever seen

Praise him, honor him, welcome him into the light.
Praise him, honor him, bring him out of endless night.
Unto us a child is born.

Unto us a child is born, May he fill our hearts with love
and everlasting light
Unto us a child is born, we will keep his fires burning
through the darkest night

Praise him, honor him, welcome him into the light.
Praise him, honor him, bring him out of endless night.
Unto us a child is born.
