Storm's out on the water
Watch it getting closer
Are you coming home

All these years we've wondered
Trying to break the cycle
All these years of hope

And my heart feels the strain
But it makes me feel like i am alive again
Sometimes in our lives
We need the pain

So i find some candles
Put out all the anchors
Pull the shutters down

Makes me think about us
All those things that got lost
Still we're holding on

And the storm rushes in
But it makes me feel like i'm alive again
But sometimes in our lives
We need the pain

The wind, the rain
The storm will wash us clean again
The wind, the rain
The storm will shake us up again
The wind, the rain
The storm will make us think again
The wind
And maybe we can start again

Storm's out on the water
Sea and sky become one
Are you coming home
