Wandering between the shades  
I'm just an empty reflex to the moon  
Fearing the death that's shown at each step  
In this cold night  
Wandering between the shadows  
Escapin form the darkness that pursues me  
In this morbid night  
With no face...without a law!

I feel a deep anguish  
That becomes anxiety at each sight  
Tired, I leave my body in your cold embrace

[Bridge]  
I feel my blood flowing trough your frozen lips  
As a tear falls, I caress your face

[Chorus]  
Deliriums and desires  
Travelling in my feverish body  
And I can't control it  
In a perfect fusion where my soul dances  
At the beat of the Suffering Symphony

"And in the dense night while I clamor your name  
I still hear that inebriating song  
Calmly whispered  
Being the pain only a dream  
Until the Dawn!"

[Bridge]  
I feel my blood flowing trough your frozen lips  
As a tear falls, I caress your face

[Chorus 2x]  
Deliriums and desires  
Travelling in my feverish body  
And I can't control it  
In a perfect fusion where my soul dances  
At the beat of the Suffering Symphony
