The human race has risen and will fall  
We are maybe the last human on earth  
We destroy our environment  
And we just try to save ourselves

No one thinks about the animals  
Cute things like cows  
With brown spots, and fluffy fur  
Does anyone think of them at all?

So many people tried to show up the governments  
But the all just failed  
All the power is in others hands  
And no one cares about the cows!

This is about fuckin' cows in the ass!  
Muuuuuuuuuuuh!

You feel her skin you are aroused  
You cannot think about your act  
You just go on, you will not stop  
Until you killed the fuckin' cow

What the hell, you had done  
You just killed your lovely cow  
Now you're sorry for your behavior  
But the cow is dead, it's over

When it is dark, you take your hatchet  
You hack your cow in little pieces  
You freeze the flesh but you are sorry  
You suicide because of worry
