We are here to break your face
And not your heart
This is the time for the bleeding truth
That you not understand

You dream about freedom
But when we are ready with you
Scream it loud
To the fucking sky

You bastard raped lil' children
They can't live with this pain
They can't sleep with this thought
What you have done

You feel pride in your sick mind
But we say 'goodby' to your destiny
The circle around you is small
The punch in your face makes you faint

DIE MOTHERFUCKER
You have lose this fight about us
