### "Biogenesis"

An overbearing dogma in disguise  
Superstition displacing all reality  
Debasing mother nature and dreaming of Intelligent  
Design  
Adulterated doctrine, so abstruse, beyond all reason  
and apart from any evidence  
Idolizing supreme forces while trampling down  
creation  
Unable to accept their unimportance, their  
insignificance  
Prospecting vindication for existing misery  
Scorn this indoctrination, pressed on by a profane  
confraternity  
Shame for the summit of creation

Let sanity prevail!  
Defending Darwin's throne  
Where blind belief and science meet we're defending  
Darwin's throne
