Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on

I heard a rumor that fires were started

Flame in the streets and tension uncharted

Bigger than life at the edge of the city

Ashes and diamonds gleaming with pity

Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on

Between midnight and dawn, you slept through the
deadlines

Believe in me and we'll hit the tall headlines

Look up and laugh, be happy today

Here come the waves, count three and pray

Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on

A global affair in big house, U.S.A.

A moving violation, angels over Broadway

The next voice you hear will be the main attraction

The next time we love, standby for action

Meet me tonight and love me forever

Let's be happy, let's be famous whatever the weather

The rain must fall and night time is calling

Golden boy and golden girl, it's a great day in the morning

Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on

Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on

Who'll stop the rain?

Who'll stop the action?

East side, west side

The world moves on
