"Six Of Them"

There's six of them and only one of me
My back's against the wall and only one good knee
Well here they come and they're closing fast
I better get if I'm going to last
A fight on the street and who's to blame
Working my way through society's game

So I live the way I want, it's got to be a crime
You screwed up your life, now you fuck with mine
The good luck in my life will never stay
Nothing I can do to change my fate
This boredom is driving me insane
I look around and who's to blame
Watching my friends drown in fear
There's nothing left nothing here
Six of them
And only one of me
