(whooo whoooo)

How do I end up in the same old place,
faced again with the same mistakes,
so stubborn thinkin I know what is right,
but life proves me wrong everytime,
takin roads that lead me nowhere,
how do I expect to get there,
but when will I learn to just put you first.

(Chorus)

I come to you now when I need you,
but why do I wait to come see you,
I always try to do this on my own but I was wrong cause only with you can I move
on. Can I move on.

(oh)

When I awake it's you that makes
me strong,
and I know that you've been with me all along,
so many times I begin to close my eyes and listen to my heart,
with you life is so easy why do I
make it hard,
oh takin roads that lead me nowhere how do I expect to get there when will I
Learn to just put you first.

(hey!)

(Chorus)

I come to you now when I need you,
but why do I wait to come see you,
I always try to do this on my own but I was wrong cause only with you can I move
on.

I get out of my own way, let you have your way.
Cause I realize Im no god on my own,
I'm there for you, I'll sell for you
I can't live without you. Noooo

(Chorus)

I come to you now when I need you, why do I wait to come see you,
I always try to do this on my own but I was wrong, I was wrong, I was wrong. With
only you, only you, with only you. Can I move on, can I move on, can I move on,
