[Hell Razah] We got ice cold Moet, room service,
project sex Sweet vampire, candle fire, kissing my neck
Richard Pryor cracking jokes, on the TV set I heard the
breast of a woman is more bitter than death But God
made male and female to be one flesh Keep a law and
have love and respect, we kept warm Offa body sweat,
intellect is what I reflect Now lay ya head on top of my
chest, relax your thoughts I was struck by a mother cut,
fingers were soft Phone ring is hard reached out, they
cut the ringer off Play the sport like Jordan when he run
the full court At halftime we can fall out and both bust
off In the hour like we like gunpowder and raise up And
hit the shower with my sunflower "You gonna want me
back" - sample [Hell Razah] I thought the love that we
had was deepest, we shared secrets You kept me
strong in my time of weakness I was damn near
speechless and sleepless To share you, come on, ma,
be the cheapest Now you acting like them birds you be
in the streets with Coming in beefing, it's obvious you
out cheating I tried to play it off, read it, but I can't
believe you So now I'm leaving you that diamond ring
and you can keep it
