(m - weikath / helloween, l - weikath)

So far from our system we came here throught space
To leave poisoned spheres for your race
Our knowledge we trade for the time shared on eatrh
To take and give for what it's worth

On our screens
We've been shown your world
Plead for your welcome you won't get hurt

Mission motherland
Another chance
With sunlit soil and air to breathe
Is there any place for us to live
To grow descendents to be free

You gave us resources
You gave us advice
To deal with the unknown to get humanize
We've shown your dimensions
And brought you on ways
You've never seen yesterday

Hand in hand
We will march through time
So much more to research and find

Mission motherland
Another chance
With sunlit soil and air to breathe
Is there any place for us to live
To grow descendents to be free

When you hear these words
We've taken cold refuge in freezers
To keep us live
What we did not know
Your central star called sun
Sends lethal rays to earth
Say how many of us died in the streams of light
Faceless bodies, morbid cries

Doomed our colonies
Wake us when
You're healed the world
Save our souls

When will we be as as one again
And fulfill what we understand as

Mission motherland
Another chance
With sunlit soil and air to breathe
Is there any place for us to live
To grow descendents to be free
