"Thank You"

Visit "[Thank You](#)" on MotoLyrics.com

So many things I didn't say
is it too late now that you've gone away
so many words, so many ways... if you can hear me
now
there's something I've got to say just one more talk just
one more touch if ones too much then I just want to say
Thank you for everything you've ever done for me
(done for me!)... I just want to say thank you for all the
things... for saving me (saving me!)

so many times so many days
you've helped me threw helped... walked me threw the
rain. so many tears have washed away if you can hear
my voice there's something I have to say, just one
more talk just one more touch if one's too much then I
just want to say thank you for everything you've ever
done for me (done for me!)... I just want to say Thank
you for all the things... for saving me (saving me!)

It's been so long... they say time will heal everything
could you send me a sign to fill this hole in my life...
turn on a light to help me see threw it all... no one left to
rescue me... save me!

Just one more talk just one more touch if one's too
much then I just want to say thank you for everything
you've ever done for me (done for me!)
I just want to say thank you for all the things... for
saving me (saving me!)
I just want to say thank you mother, thank you father,
thank you sister for saving me
I just want to say thank you brother, thank you daughter
thank you my best friends
