No Words

Up all night tryin to write everything about love I
understand
So there's no words to this song
You and me through thick and thin thank you lord but
where do I begin
Cause there's no words for this song

Chorus... A lot I could say but nothing quite feels right
cause there's no words there's just no words at all...

In the brief light of my own clear mind thought I'd write
how I love my time
with you... But there's no words for this song...
Could be wrong that's alright, I'm just sayin how
grateful I am...
And there's no words for this song

Chorus... A lot I could say but nothing quite feels right
cause there's no words there's just no words at all...
flowery words won't do when I think of you
and how grateful lord I am there's just no words for this
song
