I know the things that hurt you by heart  
I know before the bad feelings start  
I'm watching how you turn away melting inside  
And I know you think you'll fix it yourself  
You think of Me, it scares you away  
Pretty sure you know what I'd say  
You've heard so many people cry, speaking for Me  
They all claim  
You oughta know right by now  
(Chorus):  
Take a look at Me, don't you know Me  
I've always been by your side  
Take another look at Me, you can need Me  
I know when you're tired, and when you're alone and  
lost.

-----  
You're so afraid of tippin' your hand  
Or learning where this hurting began  
You like the way they see you now, from the outside  
So you try to hide how desperate you are  
(Chorus):  
Take a look at Me, you can trust Me  
I'll always be by your side  
Take another look at Me, you can need Me  
I know when you're tired, and when you're alone and  
lost

-----  
(bridge):  
I'm not surprised by the things you do and say  
You'll never see Me walking away  
I've been there at every turn you take,  
And the mistakes you've made  
It hurts to see you not looking to Me  
I'm always the faithful one, and always will be...  
(instrumental)  
(repeat chorus)
