Richard Bryant
All the pretty sisters in a row
I fell in love with the middle child
She's the one that caught my eye
Down at the annual family fish fry
Her little sister shows off a thousand charms
I fell in love with the middle child
Her bigger sister shows them too
But neither one of them would do
She won't make up her mind on anything
Until her sisters have their say
It can make me crazy still I
Wouldn't have her any other way
All the pretty sisters in the world
I fell in love with the middle child
But she's the first one I run to
I suppose it's so cause I'm a middle child, too
