Please...

I really want some more

You promised me...

I took a little gore

And you left me

The more you want it

The more obsessed you end up being

(The more obsessed you will be)

Run into my veins

Share this flesh with me

In my blood you can sail

Scare me

You hurt me, I love you

(This shade redraws your lust)

You hit me, I heat you

(Shows this heart I've just rust)

You leave me, I live in you

So I'll let the serpent free

And let temptation be

Face you holy fucking sins

Preach and leave all your creeds

Preach and leave all your creeds

It's not time to make it

Dozens of lives are with me

The more you want it

(The more obsessed you'll be)

Run into my veins

Share this flesh with me

Despite your good behavior

I ain't give you a chance

Things like this are so hard

You leave me, I live in you

You kill me, I need you more...
