I left your town and I won't be coming back  
You killed the lights and off you ran  
Why'd you have to be such a dream  
Oh baby I could never understand  
How just a kiss could turn a world upside down  
And I'm walkin' on the clouds when I'm with you  
You had that Hollywood smile  
That the highest starlets would die for  
But your head is in the clouds  
If we ever stood on the same ground  
How fast could you outgrow me  
It's like chasing after that shooting star  
Just to catch your eye  
If I had more shades of red to color with  
I'd paint us a happy ending  
But these days even I laugh at you  
Keep your goodbye kiss
