Last night did you understand

How I trembled inside

When you held my hand

And do you know when I'm alone

I always pretend that we

Are more than friends

And I'm dreaming of your kiss

When I lay awake in the dark

How I'm wishing I could share

the secrets of my heart

Chorus:

You're there everywhere I go

In every face I see a longest winding road

Endlessly I am so lost in love

I wish that you could know

I want you, everywhere I go

I hear your voice goin' round in my head

No matter who's talking to me, I hear you instead

So, here we are again, but not like before

I want to give you so much more

If you're feeling that my touch

Is growing stronger, maybe it's true

I can't hide it from myself

How can I hide it from you?

(Chorus:)

I am so happy now

You've finally found out

Tonight, this love is letting go

If you're feeling that my touch

Is growing stronger, maybe it's true

I can't hide it from myself

How can I hide it from you?

(Chorus:)

I wanna see you, hear you,

Feel you, everywhere I go
