Locusts are coming I am the funeral dancer on the
outer wave... Spine will twist, heads will cave the outer
wave I am the funeral dancer on the outer wave... Spine
will twist, heads will cave the outer wave Plastic heads
with painted sockets and death rode through the sky
like a rocket So this is it Everything dies so fast With
dust on your lips You're a dead motherfucker Wading
through a world of shit You were born to die like this
The fiends nod off after bloodsex and blasphemy Tell
me do you exist? You were born to die like this for me
Chin smeared red with conspiracy Chins smeared red
with conspiracy With dust on your lips Tell me do you
exist? You were born to die like this -?- Pale spirits
laughing into the abyss You were born to die like this
With dust on your lips Pale spirits laughing into the
abyss You were born to die like this, baby Tell me do
you exist? You were born to die like this Naked and
tripping, killing flowers Empty is the urge to devour I'm
dead bored with your deathless blues Scream for me,
and I'll die for you Scream for me, I'll die for you I'm
dead bored with your deathless blues Devour...(12x)
