You get my goat; I'll slit your throat  
I'll cut your head off while I'm at it

We've got a date so don't be late; I don't think eight is  
all that early

You're never ready, you're never ready  
We're going steady, so what's your problem?

I'll give you something to cry about!  
I could care less about how you dress  
Just bring plenty of money let's make the scene before  
things get mean  
And, baby, don't call me honey

You're never ready...

I'll give you something to cry about!
