(Allee Willis, David Lasley, Lauren Wood)

wake up concern
'cause it don't feel right this way
so much to learn
till love can have a say

what a little trust can do
always heard that faith can move a mountain
I still think there's hope for me and you
take a little time with me

[Chorus:]
show me how (show me how)
show me how (show me how)
how to love (how to love)
'cause I need to know right now
(show me how)
show me how (show me how)
how to love (how to love)
'cause I need your love right now

too many nights (too many nights I know)
I lived in stranger's eyes
too tired to care (too tired to care I said)
the dark just let us lie

now I need someone to hold me
won't you say that I'm the only one
you know everybody needs to believe
the chance for love ain't gone

[chorus]

(show me how) oh yeah
uh

[guitar solo]

ooh ooh ooh ooh

what a little trust can do
always heard that faith can move a mountain
I still think there's hope for me and you
take a little time with me, ow

show me how (show me how)
show me how (show me how to love)
how to love
'cause I need your love right now
show me how (show me how to love)
how to love
'cause I need your love right now
(show me how)
show me how (show me how)
(show me how)
'cause I need to know right now
(show me how)
show me how (show me how to love)
how to love
'cause I need your love right now
show me how
(show me how)
oh oh oh oh oh ohhh, yeahh, baby
(show me how) how
