Visit "[Jennifer's Cold](#)" on [MotoLyrics.com](https://MotoLyrics.com)

on the freeway all the cars have stopped because the  
big news has dropped  
all the phones are ringing  
it's got all the neighbors singing  
police chief is calling the detectives  
navy seals are being selected  
president is calling his advisors  
greenpeace is putting out flyers  
we've got ourselves a little situation  
it's worse than an alien invasion  
jennifer has got a cold  
and everyone has got to know  
there's a news break for everybody watching  
jennifer has just started coughing  
the doctors can't explain it  
"how did she ever obtain this?"  
all her friends are sending get well cards  
"you can beat it, just got to fight hard"  
all the world is sitting home waiting  
all the priests are singing and praying  
swat team has jennifer surrounded  
coast guard takes her to an island  
out there no one gets infected  
jenny lives where she can be protected  
united nations emergency meeting declares the whole  
world is grieving  
and peace will come if jenny just gets well  
please come home soon...
